Every layer on this sheet is drawn from the public datasets listed in Data sources; nothing is simulated or hand-digitised. For orientation and research planning, not for survey, navigation or legal boundaries.

Limits: Campground positions are Overture place points and can be offset from the real site; 38 candidate(s) were dropped by the documented filter. · Elevation is a 1 arc-second DEM, so slope and height above the river are indicative at campground scale, not survey values. · Observation points show where people record species, not abundance.
