Every layer on this sheet is drawn from the public datasets listed in Data sources; nothing is simulated or hand-digitised. For orientation and research planning, not for survey, navigation or legal boundaries.

Limits: Depths are gridded NAVD88 heights, not a nautical chart and not for navigation. · Model currents and temperature are a forecast-system nowcast, not measurements. · Species records are presence records; density reflects observer effort as well as abundance. · The 0 m NAVD88 line is not the shoreline.
