Every layer on this sheet is drawn from the public datasets listed in Data sources; nothing is simulated or hand-digitised. For orientation and research planning, not for survey, navigation or legal boundaries.

Limits: Heights are recorded for 74% of footprints in the window; the rest are grey. · Population is a modelled estimate (HRSL), counted by cell centre within each ring. · Land use, streets, places and buildings are OpenStreetMap-derived (Overture) and may lag the ground.
