Brazos Bend State Park, Texas

Environmental site map · imagery, land cover, hydrography, field observations, vegetation condition and climate

29.3815° N 95.6027° W · park area 21.7 km²

WGS 84 / UTM zone 15N (EPSG:32615)

LOCATOR

LEGEND

Boundary and base

- Park boundary (Overture land_use)
- Surface water
- Road
- Trail / track
- Named point of interest

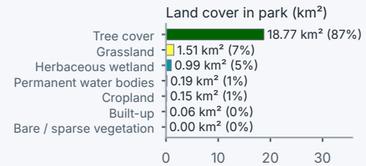

Land cover inside park (WorldCover 10 m, 40 % opacity)

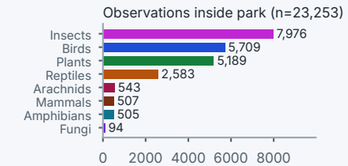

- Tree cover
- Grassland
- Herbaceous wetland
- Permanent water bodies
- Cropland
- Built-up
- Bare / sparse vegetation

Research-grade observations

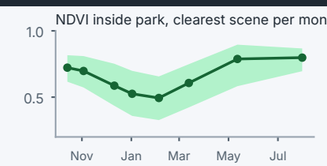

- Birds
- Reptiles
- Amphibians
- Mammals
- Fishes
- Insects
- Arachnids
- Plants
- Fungi
- Molluscs
- Other

Prepared 2026-10-21 · site-maps 0.1.0 (8d12354) · data retrieved 2026-10-21

Every layer on this sheet is drawn from the public datasets listed in Data sources; nothing is simulated or hand-digitised. For orientation and research planning, not for survey, navigation or legal boundaries.

Limits: Land cover is a 10 m global product and misclassifies small features. · The park polygon is OSM-derived, not a surveyed boundary. · Observation density can reflect observer effort as well as biodiversity. · NDVI months without a clear scene are absent, not interpolated.
