Every layer on this sheet is drawn from the public datasets listed in Data sources; nothing is simulated or hand-digitised. For orientation and research planning, not for survey, navigation or legal boundaries.

Limits: Power, pipeline and substation features are OpenStreetMap contributions carried by Overture, not an engineering or utility record; voltages only as tagged; absence of a feature does not mean absence on the ground. · Plant attributes are WRI Global Power Plant Database v1.3.0 (unmaintained since early 2022; Overture's plant tag cites U.S. Energy Information Administration - EIA-860 - 2021). · Land cover: ESA WorldCover 2021 (statistics on a 30 m grid).
